UK Product Security and Telecommunications Infrastructure (Security Requirements for Relevant Connectable Products) Statement of Compliance

We, Microsoft Corporation, as the manufacturer, declare in our opinion and under our sole responsibility, that XBOX Nano Controller, Model Number 2147, complies with the applicable requirements specified in Schedule1 of the UK Product Security and Telecommunications Infrastructure – Security Requirements for Relevant Connectable Products (2023).

The defined support period for XBOX Nano Controller, Model Number 2147, at the time the product was initially placed on the market on November 4th, 2026, is November 4th, 2031.

Xbox lifecycle updates and support periods are published by Microsoft at aka.ms/xbox-security-update.

Security vulnerabilities should be reported to the aka.ms/msrc-regulatory. Users may submit a report without signing in by selecting 'Generate Token' and following the instructions provided.

Microsoft will review submissions to determine whether they constitute a aka.ms/definition-of-security-vulnerability and assign validated reports to the relevant product engineering team. Initial triage typically occurs within two U.S. business days. Where users elect to receive communications, updates will be provided during the triage process.
