

Based in Italy, Medipass has been providing technological solutions to the medical industry since 1995, including financial, engineering, and management services. The company specializes in diagnostic imaging and cancer-treatment facilities.

## SITUATION

Medipass wanted to find a way to standardize its project management so that users could share documents and updates in a consolidated environment. The company needed a cost-effective solution and was already using Office 365, so it decided to adopt Microsoft Project Online.

## BENEFITS

- Fast and easy adoption by employees
- Integration with SharePoint sites and improved document management
- Increased confidence

“Now that we’re using Project Online, team communication is more efficient and we are spending less time on administrative project management tasks. For a company like us, that’s very important.”

**Giulio Iachetti,**

Site Manager and Project Manager, Medipass
