

Workshop - Microsoft Defender for Office 365

WorkshopPLUS

Duration: 1 Day [Remote | Onsite]

Difficulty Level: 200 - Intermediate

Description

This engagement is designed to give you a comprehensive overview and deeper understanding of Microsoft Defender for Office 365 (MDO). Microsoft experts will help you explore topics such as MDO architecture, features, and settings. They will guide you through best practices for configuring MDO, ensure you understand safe attachments and safe links, and teach you about automated investigation and response. Additionally, you will gain insights into reporting.

Objectives

- Gain a deeper understanding of Microsoft Defender for Office 365.
- Optimize your MDO configuration.
- Establish proficiency in using advanced settings in MDO.
- Gain basic troubleshooting skills for MDO-related issues and learn how to investigate security incidents using tools in the security and compliance center.

Outcomes

- Understand the administration and configuration of MDO.
- Deploy knowledge of MDO configuration, administration, reporting, and incident investigation.

Methodology

Learn by example

Engage in discussions and presentations to deepen your understanding of Microsoft Defender for Office 365.

Scope

This offering is focused on the tools included in the Microsoft Defender for Office 365 add-on license. These tools are available for all Office 365 tenant types.
