

Windows 11 Tech Days

WorkshopPLUS

Duration: 1 Day [Remote and Onsite]

Difficulty Level: 300

Description

This offer is designed to accelerate the adoption of the latest version of Windows by highlighting essential aspects such as security, user experience, and management enhancements. The Cloud Solution Architect will provide detailed information on the various Windows editions, lifecycle, continuous innovation, servicing updates, and hardware requirements to ensure your systems are fully prepared for the upgrade. Special attention is given to the benefits of cloud-native integration, including Entra joined and Hybrid setups, and advancements like Copilot+ PCs and Cloud PCs with Windows 365 or AVD.

Objectives

- Introduce Windows 11's core features, focusing on security, user experience, and management improvements.
- Provide a detailed overview of the different Windows editions, lifecycle, and continuous innovation processes.
- Highlight the security advancements in Windows 11, focusing on Zero Trust principles, hardware root of trust, and passwordless authentication.
- Guide users through the new UI and features like Snap assist and Copilot to boost productivity.
- Explain the new accessibility features and enhancements compared to Windows 10, ensuring inclusivity for all users.

Outcomes

- Enhanced understanding of Windows 11 security features, ensuring a more secure work environment.
- Improved user productivity and engagement through familiarization with the new user experience features and interface modifications.
- Increased accessibility for all users, leveraging the latest accessibility features introduced in Windows 11.
- Comprehensive knowledge of the different Windows editions, lifecycle, and continuous innovation, ensuring systems are well-prepared for current and future updates.

Delivery Outline

Suggested Participants

Suitable for Business decision makers, CSUITE, Line of Business, IT and Security Operations. Depending on content and agreed upon agenda, the sessions can also be tailored to more specific audiences.

Technical requirements

- Basic familiarity with Windows operating system.

Agenda

The agenda is built of readiness modules as listed below:
