

Microsoft Government Requests Report

Enterprise Disclosures to Law Enforcement: July to December 2025

ENTERPRISE DEMANDS ARE COMPARATIVELY RARE

Microsoft publishes a biannual Government Requests Report that details the number of legal demands for customer data that we receive from government agencies around the world.¹ On average, Microsoft receives more than 55,000 law enforcement demands each year, impacting roughly 160,000 individual accounts, but less than 0.7% of those legal demands seek enterprise customer data.²

GLOBAL ENTERPRISE REQUESTS: JULY TO DECEMBER 2025

In the second half of 2025, Microsoft received 190 total requests from law enforcement around the world for accounts associated with enterprise customers. Of those 190 requests:

- In 96 cases (51%), the requests were rejected, withdrawn, no data was available, or law enforcement was successfully redirected to the customer.
- **In 94 cases (49%), Microsoft was compelled to provide responsive information:**
 - In 45 cases, we were required to disclose customer content.
 - 31 of such disclosures were associated with U.S. law enforcement.
 - In 49 cases, we were required to disclose non-content data (e.g., such as basic subscriber information and IP logs).
- **None of these disclosures involved Azure content data** belonging to a commercial, public sector, or educational customer.
- **None of these disclosures involved Dynamics 365 data.**

CROSS-BORDER ENTERPRISE DISCLOSURES

Of these 190 requests:

- Microsoft provided content data to U.S. law enforcement related to 3 non-U.S. enterprise customers whose data was stored outside the U.S.
- One of the 3 customers was located in the EU/EFTA.

¹ The Government Requests Report (GRR) includes information, including this Enterprise Disclosure One-Pager, based on Microsoft's receipt of legal demands from law enforcement authorities around the world. Information regarding U.S. national security process is separately reflected under the U.S. National Security Orders tab in the GRR.

² For the purposes of this report, "enterprise customer" generally includes entities (commercial, government or educational) that purchase more than 50 seats for one of our commercial cloud offerings, such as Microsoft 365, Exchange Online, and CRM Online.
