EPEAT SUR 5.3.1 Firmware Update Availability

Firmware Updates Microsoft makes the latest available firmware updates for Surface devices listed in the EPEAT® 2.0 Registry available for a minimum of five years following the device's end of production. Information on the latest available firmware can be found at Drivers - Microsoft Download Center.

EPEAT SUR 5.4.4 Software parts pairing for notebook computer, tablets and mobile declaration

---

Microsoft does not prevent or inhibit repair of applicable Surface notebooks and tablets through the use of paired serial numbers. Replacement parts, whether issued by Microsoft or an authorized third party, are capable of full function upon physical installation without the need for paired serial numbers. For notebook computers, Microsoft may allow part pairing only where necessary to support subscription services as part of a contract or software license management.

EPEAT SUR 5.6.2 Secure data deletion for circularity

Microsoft makes the applicable user data sanitization tool available for Surface devices listed in the EPEAT® 2.0 Registry for a minimum of five years following the device's end of production.

The Surface Data Eraser functionality is available through the Surface IT Toolkit. Surface Data Eraser enables secure data sanitization of supported Surface devices and provides functionality to generate a certificate of sanitization following a successful data wipe. [Surface Data Eraser (IT Toolkit) - Surface | Microsoft Learn]

The Surface IT Toolkit is made available through the Microsoft Download Center: Surface Tools for IT as part of Microsoft's Surface tools for IT professionals.

Microsoft

Facility Energy Reporting

For final assembly facilities within the scope of this criterion, the manufacturer publicly reports the number of facilities by country and their combined annual energy consumption. The energy data is reported by the country and includes a breakdown of primary fuels and electricity used, expressed in an appropriate unit such as gigajoules per year. Significant energy sources representing up to 95% of total supplier facility for energy consumption are included in the disclosure.

This information is disclosed in accordance with EPEAT criterion 4.3.4(a).

Final Assembly Facilities Energy Consumption

Country and Number of Facilities	Total Annual Energy Consumption (GJ)	Types of Primary Fuels and Electricity (GJ)
China – 3	1,144,434.6	Electricity – 1,136,660.8 Natural Gas – 7,045.2 Diesel Gas – 692.6 Diesel & LPG - 36
Ireland - 1	6,446,235.6	Electricity – 5,370,937.2 Natural Gas – 1,065,798 Diesel & LPG – 9,500.4
United States – 5	24,351,872.4	Electricity – 19,863,993.6 Natural Gas – 4,463,956.8 Diesel & LPG – 23,922
Vietnam – 2	1,194,289	Electricity – 1,194,136 Diesel Gas – 153 Diesel & LPG – 2,548.8
