

Defender Experts Threat Intelligence

Designated experts translate the evolving threat landscape into clear, prioritized guidance

Microsoft Defender Experts Threat Intelligence is an expert-delivered service that gives your security team continuous, curated insight into the threats most likely to target your organization.

Rather than another stream of raw alerts, designated Microsoft threat intelligence experts interpret the global threat landscape for you, filtering it by your industry, geography, and environment, and translating it into clear, prioritized guidance your team can act on.

- ✓ **Cut through the noise** and focus on the threats that matter to you.
- ✓ **Act with confidence** guided by expert recommendations and prioritization.
- ✓ **Stay ahead of attackers** by spotting evolving campaigns before risk reaches you.

The difference for your team

Designated Threat Intelligence experts

Ongoing access to seasoned experts who interpret evolving threats, provide context, and help guide response decisions.

Executive and technical insight

Executive-ready intelligence for leadership combined with deep technical guidance for defenders and practitioner.

Threat briefings and proactive alerts

Regular threat briefings and proactive alerts that provide early warning and insights tailored to your organization.

How the service works

Monitors evolving campaigns and transforms global threat signals into customer-specific guidance.

Detect

Continuously monitor evolving attacker campaigns and emerging threat activity.

Analyze

Filter and prioritize global threat signals based on your organization, industry, geography, and environment.

Contextualize

Translate threat activity into customer-relevant intelligence so teams understand what matters most.

Guide

Provide clear recommendations and expert interpretation to help determine next actions.

Act

Enable faster decisions and proactive defense through early visibility and actionable threat insight.
